SATIN FINISH

#1 TRUSTED
BRAND FOR
PROTECTION

Urethane Fortified Acrylic Formula

Paint & Primer In One

Superior Resistance to
Scuffing, Fading & Peeling

Interior/Exterior

DOVE GRAY

ONE GALLON (128 FL OZ)/(3.78L)

See cautions on back panel

WOOD

CONCRETE

RUST-OLEUM® PORCH & FLOOR COATING provides a protective, decorative finish on interior or exterior wood and concrete surfaces. The urethane-fortified acrylic formula is engineered for color retention and adhesion, and resists scuffing, staining, cracking, and peeling. The durable, UV, weather & mildew resistant finish is easy to maintain, provides excellent coverage over new or previously coated surfaces, and can be easily cleaned up with soap and water. For use on porches, patios, basements, walkways, stairs, and railings. Not for use on garage floors or driveways.

PRECAUTIONS. May cause eye, nose, throat and skin irritation. Avoid contact with skin and eyes and avoid breathing vapors or spray mist. Use only with adequate ventilation. Wash thoroughly after handling. Close container after each use. **FIRST AID:** If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical assistance immediately. In case of eye contact, flush immediately with plenty of water for at least 15 minutes and get medical attention; for skin, wash thoroughly with soap and water. If swallowed, get medical attention immediately.

WARNING: Cancer and Reproductive Harm - www.P65Warnings.ca.gov

CAUTION: KEEP OUT OF REACH OF CHILDREN - DO NOT TAKE INTERNALLY.

READ ALL INSTRUCTIONS CAREFULLY BEFORE STARTING PROJECT

WHERE TO USE: For use on interior and exterior wood and concrete surfaces. Apply when air (ambient) temperature is 50-90°F (10-32°C) and relative humidity is below 85%. Do not paint outdoors if rain is expected within 24 hours. Not recommended for use on asphalt.

- Use on all species of pressure-treated lumber, Pine, Fir, Hemfir, Cypress, Cedar, Redwood, Poplar, Hickory and other North American hardwoods. Ideal for weathered wood where hiding signs of aging is desired. New wood should age for a minimum of 6 months before applying Rust-Oleum Porch & Floor Paint.
- Allow newly poured concrete to cure for a minimum of 28 days prior to coating.

SURFACE PREPARATION: Whether over bare or previously coated wood or concrete, proper surface preparation is critical to performance:

1. Before coating, use a wire brush or sander to remove any loose or unsound surface areas. For maximum adhesion, strip or scrape away any unsound paint.

2. Thoroughly clean to remove ground-in dirt, mildew, mold and algae stains, and any other surface contaminants with an appropriate heavy-duty cleaner/degreaser (sold separately).

3. Rinse thoroughly with fresh water and allow to dry before coating.

Uncotted, new wood: After cleaning, conduct a *Splash Test* to ensure the surface is ready to be coated. Sprinkle several handfuls of water on multiple areas of the surface. If the water absorbs rapidly, the surface is ready to be coated. If the water beads, puddles or is not absorbed, an internal or external barrier exists and must be eliminated (strip/sand) before painting can begin.

Bare concrete: After cleaning/degreasing, for proper penetration and maximum adhesion, use **Rust-Oleum® Clean & Etch or Concrete Etch** (sold separately). Follow label instructions carefully and allow the floor to dry completely. Wipe your fingers over the clean, dry surface. If you see any dust or powder on your fingers, repeat rinsing and scrubbing until the floor is clean.

Previously coated concrete: Use a wire brush to remove any loose or peeling paint or stain. To ensure proper adhesion, scuff sand the entire surface. Wash the entire floor with **Rust-Oleum® Cleaner & Degreaser** and scrub the surface using a stiff bristle brush or broom. Spot clean all exposed concrete surfaces using **Rust-Oleum® Clean & Etch or Concrete Etch**. Rinse thoroughly and allow to dry completely.

WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN YOUNG CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead.

APPLICATION: Rust-Oleum® Porch and Floor Coating is ready to use. Do not thin. Use only when air (ambient) temperature is 50-90°F (10-32°C) and relative humidity below 85%. Do not paint outdoors if rain is expected within 24 hours. This product is self priming. For the most durable finish apply two coats at the recommended coverage rate (see below). First coat will dry to touch in 1-2 hours. Allow 4-6 hours dry time before applying second coat.

- If using more than one gallon, intermix all cans of the same product to ensure color uniformity. Stir thoroughly before applying.

- Apply with a high quality bristle brush, 3/8" nap roller, or an airless sprayer (do not use a pump sprayer). Brushing is the preferred method, especially for rough sawn wood.

- Al rociar o pasar el rodillo, asegúrese de pasar una brocha en el sentido de la veta (longitudinalmente), esto eliminará cualquier gota, pintura corrida, cobertura desigual o charco superficial. Para minimizar las marcas de solapado debe mantener un borde húmedo.

Note: Painted floors may be slippery when wet. If desired, an anti-skid additive (sold separately) may be added to the mixed coating.

COVERAGE: Each gallon covers approximately 300 to 400 square feet of previously painted or smooth, bare surfaces, per coat. Coverage on rough or porous surfaces is approximately 200 to 300 square feet per gallon, per coat. For best appearance, apply two coats.

DRY TIME: Because temperatures and humidity fluctuate, allow a minimum 24 hours to dry before light foot traffic and 72 hours before returning furniture to deck/porch floor. Avoid dragging furniture across surface. On newly coated surfaces, allow 7 days cure before washing.

CLEAN UP: Wash tools and equipment with warm water and a mild detergent immediately after use. To remove dried product use lacquer thinner. Clean up over-spray, drips or splatters with water IMMEDIATELY, as dried paint is very difficult to remove. Properly dispose of all soiled rags and protect unused product from freezing.

CATEGORY: FLOOR COATING

VOC: Max VOC 50 g/L

COV: Máximo COV 50 gramos/Litro

SATISFACTION GUARANTEED: If you are dissatisfied with this product, contact Rust-Oleum Product Support at 1-888-NUFLOR (1-888-683-5667) for a product replacement or a full refund of the purchase price. Refer to product number and batch code.

SATISFACCIÓN GARANTIZADA: Si no está satisfecho con este producto, comuníquese con el Soporte Técnico de Rust-Oleum al 1-888-NUFLOR (1-888-683-5667) para obtener un reemplazo del producto o un reembolso del total del precio de compra. Consulte el número del producto y el código de lote.

DRY TIME: Because temperatures and humidity fluctuate, allow a minimum 24 hours to dry before light foot traffic and 72 hours before returning furniture to deck/porch floor. Avoid dragging furniture across surface. On newly coated surfaces, allow 7 days cure before washing.

CLEAN UP: Limpiar las herramientas y los equipos con agua tibia y detergente suave inmediatamente después de usarlos. Para quitar el producto seco, use diluyente de barniz. Limpiar el exceso de rociado, las gotas y las salpicaduras IMMEDIATELY con agua, ya que la pintura seca es muy difícil de quitar. Deseche de manera adecuada todos los trapos sucios y proteja el producto sin utilizar para que no se congele.
